Press Release

Gecko Software, Inc. Releases the Commitment of Traders Plug-in

The newest plug-in for Track 'n Trade Pro proves to be a helpful resource for traders.

Logan, UT, June, 2004: The tentative release date for the Commitment of Traders (COT) plug-in will be July 1, 2004. The price of the COT plug-in is not yet available; however the price will be similar to other Track 'n Trade Pro plug-ins. Since the COT data is released on a weekly basis, the COT plug-in will include a data subscription at a minimal monthly fee.

The new COT Plug-in is displayed as a bar chart showing the buying and selling habits of commercial traders (ie. farmers, hedgers, producers and factories), large speculators (ie. banks and large financial money managers), and small speculators. An overall open interest in the market will be represented as a line graph displayed along with the bar chart.

Also included is a new indicator created by cycles expert Jake Bernstein. The JBCOT Buy/Sell Indicator is represented by 'buy' and 'sell' arrows on a futures chart and proves to be very accurate in estimating when the momentum of the largest industry players are changing direction in their buying and selling power. This new indicator is exclusive to Track 'n Trade Pro's COT Plug-in and offers traders another source to help them create a successful trading strategy.
