# Press Release

## Gecko Software, Inc. Releases Track 'n Trade v4.0 and their New Options Plug-in

The newest version of Track 'n Trade Pro demonstrating improved features that futures traders are looking for.

Logan, UT, May, 2004: Track 'n Trade Pro v4.0, the latest version of Gecko Software's charting software program, and their new Options Plug-in were released on February 23, 2004. Track 'n Trade Pro v4.0 proves to be an advance in charting software programs with many new features that include; improved scaling, individual chart options, contract specifications and expiration dates, and an improved Fibonacci ruler that displays retracements, projections, and predictors. Also new to Track 'n Trade v4.0 is the PSAR Indicator that helps with stop loss placement.

The innovative Options Plug-in gives the trader the ability to place put/call orders directly on the futures chart, calculate profit/loss on an option or on an option strategy with the unique OS Calculator (Options Strategy Calculator), calculate the "Greeks" and Black & Scholes, plus view two indicators that display the option as under or over valued. Also available with in the Options Plug-in is the ability to view interest rate history .

Track 'n Trade Pro already has the ability to download and incorporate EOD (end-of-day) Futures Data, and now offers traders EOD Options Data that will work within the Options Plug-in.

Gecko Software is already working on 2 new Plug-ins; Commitment of Traders Plug-in, and a new Indicator Plug-in that will feature additional indicators and display buy/sell arrows.
